Detailed Action

Response to Amendment

1. Applicant's arguments/remarks filed on 8/19/2005 regarding claims 7, 12, 23 have been fully considered. Claims 7-10, 12, 16-17, 23, 26 are currently pending. Claims 1-6, 11, 13-15, 18-22, 24-25 have been canceled by applicant.
2. Formal drawings must be submitted to correct the informal labels shown in Figs. 1-5, 13(a) and 13(b).

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The present application relates to a method and a base station apparatus in a wireless packet network for scheduling packets for delivery to mobile stations by calculating the channel efficiency of each corresponding mobile station, including the unique functions of scheduling packets based on the following weighting factor in response to the calculated channel efficiency:

$$W_i = \text{efficiency}_i^{\text{exponent}}$$

The closet prior art, Westerberg et al. (US Patent 6,236,656), discloses a method for scheduling packets from a base station to a mobile station based on channel efficiency for the mobile station. However, Fan fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
